Holly,

I received this email from Dr. Vogel last night.. It is very concerning to me as I know we have had discussions in the past regarding keeping the therapy room neat. I would assume you knew that this would mean the clinic as well. I do not relish getiing emails such as this from Dr. Vogel and I hope you will discuss it with him.

Hi Robin

I'm a bit concerned about your student not cleaning up and leaving a safety hazard in our narrow hallways. I'm sorry, but I feel a record is imperative, hence the picture. Although it doesn't look like much, in our facility we need to be diligent regarding safety and just plain courtesy. Someone with low vision coming from Audiology could have tripped on this object. Someone also had to clean it up. Just leaving after using materials is not acceptable and I trust you will address this with your student.
